

Product Application Chart

Recommendations

The following application chart is provided to aid in understanding where our flooring products are recommended for use. This application chart is a subjective recommendation and is predicated upon the adherence to proper installation techniques; specific location of installation; level of foot traffic; and the type and professional level of maintenance practiced on-site. As there is a wide range of variables within an environment and the characteristics of each application may vary significantly, please consult with your CBC® Flooring sales representative to determine which CBC Flooring product is appropriate for your installation.
